

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/React-Core/  
React/RCTAppearance.h

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/React-Core/  
React/RCTAppearance.h:16:60 A function declaration without a  
prototype is deprecated in all versions of C

## EXConstants

Run script build phase '[CP-User] Generate app.config for prebuilt  
Constants.manifest' will be run during every build because it does not  
specify any outputs. To address this issue, either add output  
dependencies to the script phase, or configure it to run in every build by  
unchecking "Based on dependency analysis" in the script phase.

## React-Core 14 issues

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTBridgeProxy.mm

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTBridgeProxy.mm:33:1 Designated initializer missing a 'super' call to  
a designated initializer of the super class

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTBridgeProxy.mm:397:1 Designated initializer missing a 'super' call to  
a designated initializer of the super class

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTConvert.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTConvert.m:554:26 'UIBarStyleBlackOpaque' is deprecated: first  
deprecated in iOS 13.0 - Use UIBarStyleBlack instead.

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTConvert.m:555:31 'UIBarStyleBlackTranslucent' is deprecated: first  
deprecated in iOS 13.0 - Use UIBarStyleBlack and set the translucent  
property to YES instead.

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTKeyCommands.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/  
RCTKeyCommands.m:131:53 'isIgnoringInteractionEvents' is  
deprecated: first deprecated in iOS 13.0 - Use UIView's

userInteractionEnabled property instead

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/RCTUtils.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/RCTUtils.m:228:3 'CC\_MD5' is deprecated: first deprecated in iOS 13.0 - This function is cryptographically broken and should not be used in security contexts. Clients should migrate to SHA256 (or stronger).

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/Surface/SurfaceHostingView/RCTSurfaceHostingProxyRootView.mm

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Base/Surface/SurfaceHostingView/

RCTSurfaceHostingProxyRootView.mm:52:17 Method override for the designated initializer of the superclass '- initWithSurface:sizeMeasureMode:' not found

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostView.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostView.m:79:71 'statusBarOrientation' is deprecated: first deprecated in iOS 13.0 - Use the interfaceOrientation property of the window scene instead.

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostViewController.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostViewController.m:27:54 'statusBarStyle' is deprecated: first deprecated in iOS 13.0 - Use the statusBarManager property of the window scene instead.

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostViewController.m:28:55 'isStatusBarHidden' is deprecated: first deprecated in iOS 13.0 - Use the statusBarManager property of the window scene instead.

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/RCTModalHostViewController.m:57:95 'keyWindow' is deprecated: first deprecated in iOS 13.0 - Should not be used for applications that support multiple scenes as it returns a key window across all connected scenes

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/  
RCTWrapperViewController.m

/Users/kai/Desktop/echonotes/node\_modules/react-native/React/Views/  
RCTWrapperViewController.m:32:10

'automaticallyAdjustsScrollViewInsets' is deprecated: first deprecated in  
iOS 11.0 - Use UIScrollView's contentInsetAdjustmentBehavior instead

/Users/kai/Desktop/echonotes/node\_modules/react-native/  
ReactCommon/react/renderer/components/safeareaview/  
SafeAreaViewShadowNode.h

/Users/kai/Desktop/echonotes/node\_modules/react-native/  
ReactCommon/react/renderer/components/safeareaview/  
SafeAreaViewShadowNode.h:24:42 Use of undeclared identifier

'SafeAreaViewProps'

/Users/kai/Desktop/echonotes/node\_modules/react-native/  
ReactCommon/react/renderer/components/safeareaview/  
SafeAreaViewShadowNode.h:27:9 Unknown type name

'ConcreteViewShadowNode'; did you mean

'SafeAreaViewShadowNode'?

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/fmt/fmt/core.h

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/fmt/fmt/  
core.h:378:30 'char\_traits<fmt::internal::char8\_type>' is deprecated:  
char\_traits<T> for T not equal to char, wchar\_t, char8\_t, char16\_t or  
char32\_t is non-standard and is provided for a temporary period. It will  
be removed in LLVM 19, so please migrate off of it.

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/RCT-Folly/folly/  
Range.h

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/RCT-Folly/folly/  
Range.h:191:12 'char\_traits<unsigned char>' is deprecated:  
char\_traits<T> for T not equal to char, wchar\_t, char8\_t, char16\_t or  
char32\_t is non-standard and is provided for a temporary period. It will  
be removed in LLVM 19, so please migrate off of it.

/Users/kai/Desktop/echonotes/node\_modules/react-native/  
ReactCommon/react/renderer/mapbuffer/MapBufferBuilder.cpp

/Users/kai/Desktop/echonotes/node\_modules/react-native/

ReactCommon/react/renderer/mapbuffer/MapBufferBuilder.cpp:119:33  
Implicit conversion loses integer precision: 'size\_type' (aka 'unsigned long') to 'int32\_t' (aka 'int')

/Users/kai/Desktop/echonotes/node\_modules/react-native/

ReactCommon/react/renderer/mapbuffer/MapBufferBuilder.cpp:122:36  
Implicit conversion loses integer precision: 'size\_t' (aka 'unsigned long') to 'int32\_t' (aka 'int')

/Users/kai/Desktop/echonotes/node\_modules/react-native/

ReactCommon/react/renderer/mapbuffer/MapBufferBuilder.cpp:129:39  
Implicit conversion loses integer precision: 'size\_t' (aka 'unsigned long') to 'int32\_t' (aka 'int')

/Users/kai/Desktop/echonotes/node\_modules/react-native/

ReactCommon/react/renderer/mapbuffer/MapBufferBuilder.cpp:130:44  
Implicit conversion loses integer precision: 'size\_type' (aka 'unsigned long') to 'int32\_t' (aka 'int')

/Users/kai/Desktop/echonotes/node\_modules/@react-native-async-storage/async-storage/ios/RNCAsyncStorage.h

/Users/kai/Desktop/echonotes/node\_modules/@react-native-async-storage/async-storage/ios/RNCAsyncStorage.h:53:39 Pointer is missing a nullability type specifier (\_Nonnull, \_Nullable, or \_Null\_unspecified)

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/Yoga/yoga/YGEnums.h

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/Yoga/yoga/YGEnums.h:15:1 Nested namespace definition is a C++17 extension; define each namespace separately

/Users/kai/Desktop/echonotes/ios/Pods/Headers/Public/Yoga/yoga/YGEnums.h:26:1 Nested namespace definition is a C++17 extension; define each namespace separately

Run script build phase '[CP-User] [Hermes] Replace Hermes for the right configuration, if needed' will be run during every build because it does not specify any outputs. To address this issue, either add output dependencies to the script phase, or configure it to run in every build by unchecking "Based on dependency analysis" in the script phase.
